

### Solid Surface Waiver

Thank you for choosing solid surface for your new counter tops. The color you have chosen is a color that is not intended for use in high traffic applications such as kitchens. Dark colors and gloss finish look very elegant, however, when they are used in high traffic areas, there are certain maintenance issues that all customers should consider:

- DARK COLOR'S** will show more wear than lighter ones. They will show scratches as a "white" line. Ordinary everyday use will cause this to appear. It is also prone to showing fingerprints and wipe marks. It is excellent however for vertical applications or accent style edges.)
- GLOSS FINISH:** Gloss or polished finish will also show scratches more than matte finish. It will also show fingerprints, wipe marks etc. ( It is fine for vertical applications or bathrooms and wet bars.)

Scratches can be removed by having your counter top professionally refinished periodically. There is a charge for refinishing based on the size and color of your counter top.

Counter Pro, in conjunction with the manufacturer of this product does not recommend this particular color or finish due to the extra maintenance it will require for this application. We therefore, cannot be held responsible for the color or finish you have chosen.

I/We, the customer, understand the limitations of this finish/color and agree that I/We have been advised to select a matte finish or lighter color. I/We agree to hold the dealer and the fabricator (Counter Pro Inc.) harmless should any of the above stated issues occur.
